# Security

Fixed Digital Video Surveillance (CCTV)  
Mobile Digital Video Surveillance (CCTV)  
Intelligent Video (CCTV)  
Access Control • Perimeter Security  
Automatic Vehicle Location (GPS)

Security is a primary challenge for those charged with the safety of people and places. Advances in the world of security technologies can be bewildering. Intellect Corporation can help it's clients to stay abreast of these technological advances by providing viable alternatives and solutions ranging from traditional to state of the art designs.

Intellect Corporation has successfully implemented a number of advanced security systems for fixed locations and mobile users across the USA.

Intellect can provide a system or a combination of systems for protection, safety and security of people and property. Intellect has demonstrated experience in a variety of access control and perimeter security systems.
